

Hosted Lync

Say hello to unified communications.

What is Hosted Lync?

Microsoft® Lync™ 2010 offers a unified approach to virtual interaction by delivering multiple communication channels through a single, easy-to-use desktop client. With Hosted Lync, you'll experience all the advantages of Microsoft® Lync™ 2010 without any of the hassle. We'll take care of licensing, implementation and maintenance, leaving you free to focus on your core business.

ThinkTel
A division of Distributel

Hosted Lync

A wealth of functionality for better productivity

Enterprise-level voice capability

- Complement or replace your organization's PBX-based voice system and enable users to turn their computers into full-featured business phones
- Set-up video calls in seconds thanks to enhanced support for audio and video devices
- Make and receive calls outside of the office with a standard

Federated instant messaging

- Use a single corporate profile to chat with internal teams and external contacts
- Connect with other organizations that have Lync through federation
- Chat with customers and partners using public networks such as Windows Live, Google Talk and XMPP

Unified multimedia conferencing

- Collaborate more efficiently by combining audio and video conferencing with desktop and application sharing as well as real-time document editing
- Facilitate conference setup and invitation through full integration with Outlook's familiar scheduling functions
- Easily email audio and video recordings to all attendees with a single click

Integrated online presence

- Make better communication choices based on the status, location and preferred communication methods of your contacts
- Integrate your presence information seamlessly with Microsoft SharePoint, Dynamics CRM and more
- Simplify your status updates thanks to integration with your Outlook calendar information

Why choose a hosted solution?

Hosted solution

No capital expenditure or need to purchase servers

No license purchase or management required

Licensing On Demand: scalable licensing on a month-to-month basis

Immediate turnkey deployment

Predictable monthly invoicing

No internal resources required for system maintenance or support

Premise-based deployment

Purchase and installation of servers required

Complex licensing and upgrade management process

Inflexible license purchasing model

Time-consuming and complex deployment

Various expenses and man-hours involved

Internal resources required for maintenance and support

ThinkTel – A trusted partner

ThinkTel is the first and only Canadian company to be independently certified to meet Microsoft's SIP Trunking requirements for Office Communications Server 2007 R2 and Microsoft® Lync™ 2010. Thanks to this expertise in delivering voice transmission services for Lync, ThinkTel can help your organization get the most out of any type of Lync deployment.

About our voice network:

- DID's from 1000+ cities across Canada & select US and international centres
- One of the most extensive CLEC footprints in Canada
- A redundant national voice network built on carrier-class technology
